

ARCHITECTURE

with sauce 

Print out all parts and paint them in your favorite colors, before cutting them out.

Glue the page containing the building body onto a piece of thick paper.

Cut out all parts with scissors.

Use a ruler and a wooden stick to scratch the black dashed lines, this will make them fold easier.

Add all parts to the body step by step. The instructions on the next page will help you to do so. Afterwards, decorate your tower!

CRAFTING MODEL

JUNIOR VERSION

SIMPLIFIED

The creation of this crafting set
was made possible by:

Connect pieces A to D and form a roof section. Repeat this to get a total of four roof sections.

Stick the four roof sections together using glue.

Complete the roof by adding the remaining roof sections.

The field will serve as basis for adding the first grandstand.

Attach the second and third grandstand to the field.

Complete the stadium body by adding the last grandstand.

Connect the stadium body to the roof.

Congratulations, you did it!
To share your artwork with others,
please see the last page.

A (roof top)
